

## Changing your API details

On the Text Marketer platform, click on Account Settings (top right). Click on the API config tab.

The screenshot shows the 'API config' tab in the Text Marketer account settings. It features three main sections:

- API Gateway Username and Password:** Contains two input fields, 'Username' and 'Password', both containing the text 'Testing'. Below these fields is a note: 'API Username and password cannot be changed. To change your MessageBox login details click here - [account login details](#).' Below this note is a link: 'Click the link below to test. Send SMS API Test: <https://www.textmarketer.biz/gateway/?username=nick02&password=rich02&message=test+message&orig=test&number=447703034407>'
- API Alert URL:** Contains a text input field labeled 'Alert URL' with the placeholder text 'e.g. http://www.domain.com/myalert.php'.
- API Delivery Report Options:** Contains a text input field labeled 'Report URL (landing page)' with the placeholder text 'e.g. http://www.domain.com/myreport.php'.

Your new username and password will appear at the top (circled in the above example). You will need to update your API gateway details with this information; we have provided an example of what this is likely to look like in your system.

If you are not the administrator of the system which sends your text messages, we would suggest you forward this document to them, so that they can make the necessary changes. Developers may also find the instructions at <https://wiki.textmarketer.co.uk/display/DevDoc/Simple+Bulk+SMS+API> useful.
